## Day Train

This is a great alternative to our Basic Obedience Board & Train program. Our Day Train program will provide a similar structure as our B&T program, only your dog visits during the day and does not spend the night. This program can be tailored to meet your dog's needs and help you achieve your goals with your dog. We will focus on many obedience skills as well as socialization, walks, confidence and manners in a variety of environments, and any specific behaviors or tasks you would like assistance with.

Dogs who display behavioral concerns such as severe reactivity, anxiety, or aggression will not be eligible for our Day Train program. We would happy to discuss other options, such as the Behavioral Modification program.

Free consultations are available to discuss which program may be best for you and your dog.
